

Big Alaskan Brown Bears

We have taken 455 Brown bears since 1984, these are some of the largest taken since 1992, with the largest taken in 2022. All bears were measured for B & C, top skull only, SCl scores will average about 3/8" larger. Pictures of all these bears can be seen at www.AAAalaskanoutfitters.com under Brown Bear photo album and the Newsletter page.
